Software Developer

Developing Agile mobile application using react-native.

Company : Kapiital Kapslock 2021 - 2024

Software Developer

Developing Agile web application and mobile application using reactjs.

Projects

1. TaskflowProUltimate App

Real-time automated field service management reveals and resolves inefficiencies. It also helps keep track of equipment and personnel, allowing for a rapid return on investment.

2. Elevate App

Developed an astrology and dating app with features like personalized matchmaking, horoscope insights, and real-time chat.

3. SBIOA APP

Created a school management app enabling digital attendance, fee management, communication, and student progress tracking.

4. SquareNow App

It is a Loan management application that is collaborative with NBFCs, MFIs, and global Financial Institutions of various sizes and sectors, leveraging technology to optimize business performance.

5. Pookadai Products

- **Pookadai App** – A one-stop solution for daily flower needs, simplifying prayers and rituals with on-time flower delivery.
- **Pookadai Web** – Allows customers to browse catalogs, place orders, and securely pay via credit/debit cards, wallets, or other methods.
- **Pookadai Delivery App** – Enables customers to order, track, and receive flowers or services conveniently.
- **Pookadai Purchase App** – Facilitates the buying and delivery of flowers through a dedicated mobile app.
- **Pookadai Packing App** – Helps florists and flower shops efficiently manage the packing process of flowers.

6. Susilon Beauty Art Sutdio

Engineered a fully responsive website for Susilon Beauty Art Studio, integrating a service showcase and booking interface; the platform has since facilitated over 100+ client appointments within the initial month of operation.
